

*Extraordinary*

*Terrain Models For Museums*

SOLID TERRAIN MODELING, INC.

*Show your visitors  
something they've never seen before . . .*

Solid Terrain Modeling's exclusive printing technology prints brilliant, full-color, hi-resolution satellite or aerial photography, adding realism to museum models previously unattainable. The results are as beautiful to look at as they are informative. Viewing a SOLID TERRAIN MODEL™ gives the impression of flying over the landscape and an unparalleled understanding of the area of interest.

*Fiber optics plot 54 major dams along the Columbia River Watershed at the USACE Chief Joseph Dam Visitors Center in Bridgeport, Washington.*

*A group of school children interact with a Solid Terrain Model at the Hudson River Museum "Riverama"*

*"When we remodeled last year, we had a chance to create a museum display to the outside. We decided to feature STM models and artifacts from around the world to invite visitors to take a closer look. The models are spectacular -- you can see them in the windows from two blocks away. People are drawn to them and come up off the street to find out more about them."*

*Susan Norton, Director of Explorers Hall  
National Geographic Society*

*Solid Terrain Model with Golden Gate bridge for the San Francisco Public Utilities Commission*

*Model showing bathymetry of the Channel Islands National Marine Sanctuary.*

## *Engage!*

STM models have been animated with lasers, projection displays and fiber optics. We also offer the addition of finely crafted architectural features. *And STM models are durable and touchable allowing your guests a hands-on experience.*

The models can be made any size, small enough to fit on a table top display or tiled to create expansive scenes that are absolutely breathtaking.

Solid Terrain Modeling Inc has proved to be a reliable partner, delivering spectacular looking models on schedule.

Our clients include:

National Geographic Society  
Smithsonian Institution  
Library of Congress  
Scripps Institute  
Hudson River Museum

*The devastation of the 1980 eruption of Mt St Helens shows clearly on this model at the National Geographic Society Explorers Hall.*
