

a **Solid Terrain Model** will allow your visitors to see the beauty of the land and understand the relationship with the surrounding environment with unprecedented clarity. . . It is all about effective communication.

STM models can help you inform and educate the public about your mission and projects, orient visitors to your park or trailhead and even provide products for your gift shop.

Solid Terrain Modeling first of a kind 3 dimensional models have extraordinary rich color imaging applied to the dimensional surface. These models are as beautiful as they are informative, combining the world of flat maps, satellite imagery and 3 dimensional physical terrain models.

Interpretive Center Models

When a guest arrives at a visitor center and sees a beautifully detailed color Solid Terrain Model of the park they will immediately be able to orient themselves to park features and facilities.

Trail Head Models

A hiker starting up a trail head seeing a trail map overlaying the actual physical terrain will be able to get a sense of what lies ahead on their hike, in terms of both features and the level of difficulty of the hike.

Retail Models

Give your guests something new to remember. Guests can take home a piece of the parks beauty with a framed dimensional topographic art.

Solid Terrain Models are truly unlike any other mapping technology existing in the world today. Fast, accurate and affordable.
